PRICING GUIDE

Fine Art Printing

LightSource produces the best archival fine art inkjet prints available for gallery, display and portfolio. We take great care to make your vision come to life in the final print. We offer fine art papers like Hahnemuhle's Fine Art Pearl, Museo Rag, Epson's Premium Lustre, and Breathing Color's Lyve Canvas. For more information about our print media, please call us to speak with a technician.

60x72	\$630	\$378	\$833

Hi-Res Drum Scanning

LightSource provides the best drum scans you can buy. Our Heidelberg S3900 and Primescan D8200 drum scanners extract every bit of detail that exists in your film. Our digital manager optimizes your scan, to ensure all the highlights and shadows in your film are preserved. You can save money with Raw scans, where you do the final dust cleanup. Or, you can let us do it with our corrected scans for a little bit more. No sharpening is applied to any of our scans. That way, you can sharpen as much or as little as you want.

Size	Raw	Corrected
50 MB	\$ 25	\$ 35
100 MB	\$ 35	\$ 50
200 MB	\$ 40	\$ 60
350 MB	\$ 65	\$ 85
500 MB	\$ 90	\$115
800 MB	\$110	\$125

Digital Capture

LightSource uses a Phase One digital scan back to produce the best image quality of any capture device currently available. We capture original art up to 54"x72". We also offer onsite capture at your location. Pricing is based on file output size.

200MB 16 bit capture - prints up to approx 22x30 or prints up to approx 18x24	@240ppi @300ppi	\$50
300MB 16 bit capture - prints up to approx 26x35 or prints up to approx 21x28	@240ppi @300ppi	\$75
550MB 16 bit capture - prints up to approx 36x48 or prints up to approx 28x38	@240ppi @300ppi	\$125
1GB 16 bit capture - prints up to approx 53x70 or prints up to approx 42x56	@240ppi @300ppi	\$200
